# SURFACE INSPECTION COMPLIANCE REPORT

Date of Inspection: April 18, 2001

Case Serial No.: UTU-072898

Operator: Newco Guyana

Project Description: Mining

Legal Description: NW<sup>1</sup>/4NE<sup>1</sup>/4 Sec. 5 T. 12 S., R. 6 W.

Field Office: Fillmore

Inspector: Sheri Wysong

REPORT NARRATIVE (REFERENCE STIPULATIONS BY NUMBER OR TITLE)

When I got to this site there were five people there looking around, Bob Steele, the former operator, Larry Fahn, the current operator, Sid Hullinger, of McFarland Hullinger and Bob Leary and Charlie Phillips of Kennecott. They were discussing the future of the mine, which will be to extract ore for use as flux at the Kennecott smelter. Larry Fahn stated that before the site would exceed five acres in size that the mine would go underground. When I asked what the projected start up of the mine would be, I was told that they were still uncertain.

Other than the high population of people, the mine looked the same as it has for the last couple of years.
